

“Project Hosts has reduced the cost and complexity of migration by putting it online in collaboration with expert consulting partners.”

Ludovic Hauduc, General Manager  
Microsoft Project Business Unit

## Project Migration Online

**New Offer**

Still using Project 2003? Step up to Project 2007.

We work with your solution partner to prepare, document and test your migration to Project 2007 online for up to 100 users for a fixed price of **\$10,000**

Stay online and your implementation is ready to use.

**Project Migration Online (PMO) is a combined service delivered by Project Hosts and your designated EPM solution provider. It includes:**

- Online tools to securely upload 2003 databases to a dedicated server in one of Project Hosts' SAS-70 certified data centers
- Remote desktop access to Project Professional 2007
- EPM consulting to identify issues and create documentation detailing all the steps and changes required for each customer's specific migration
- Rewrites of up to 20 Data Analysis views
- Up to 8 hours of EPM 2007 administrator training

**Some migrations may require additional services that can be quoted separately:**

- Custom SharePoint templates or web parts, or 3<sup>rd</sup> party software
- SQL reporting services redefinitions
- User training
- Migrations of larger numbers of users

**Your migrated Project 2007 implementation will be ready to use online. On-premise deployments may require additional configuration and training services that can be purchased separately from your solution provider.**
