

## **MIGRATE MICROSOFT OFFICE PROJECT IN THE CLOUD FOR \$10,000**

### **New Software + Services Offering Migrates Microsoft Office Project 2003 to 2007 and beyond**

**Sunnyvale, CA, September 16, 2009** – Project Hosts, a leading provider of hosted Microsoft Enterprise Project Management (EPM) solutions, announced Project Migration Online (PMO), a new software plus services (S+S) offering that migrates Microsoft Office Project 2003 environments to 2007 and 2010 for a fixed price of \$10,000 for up to 100 users. PMO includes consulting services to help prepare, document and test migration, and secure hosting on dedicated servers for 30 days. Customers can continue to utilize their new hosted, migrated environments long-term, or while they transition their on-premise systems.

Project Hosts has taken a new approach to an old problem and reduced the cost and complexity of migration by putting it online in collaboration with expert consulting partners. PMO overcomes IT backlogs as well as budgetary, infrastructure and staffing constraints.

“Customers recognize that Project 2007 offers significant functional and financial benefits, and we responded with a solution that lets them experience those benefits without disrupting their existing environments,” said Scott Chapman, CEO of Project Hosts. “Project Migration Online combines our hosting and administration expertise, and the configuration and consulting skills of our partners at a very low price.”

Project Migration Online is designed to meet the needs of most Project 2003 deployments. It includes online tools to securely upload Project 2003 databases to a dedicated server in one of Project Hosts' secure, SAS-70 certified data centers, remote desktop access to Project Professional 2007, and EPM consulting to identify issues and create documentation detailing all the steps and changes required for each customer's specific migration. It also includes rewrites of up to 20 Data Analysis views and up to 8 hours of Project 2007 administrator training.

“Project 2010 builds on the foundation of Project 2007 to deliver flexible work management solutions for individuals, teams and the enterprise,” added Seth Patton, Senior Director of Product Marketing for Microsoft Project. “One of the best ways for customers to take advantage of what's coming with Project 2010 is by using Project 2007 today.”

**About Project Hosts:**

Project Hosts ([www.projecthosts.com](http://www.projecthosts.com)), a Microsoft Gold Certified Partner, brings the power of Microsoft Office Project, Microsoft Office SharePoint Server and Microsoft Dynamics CRM to enterprises and teams of any size from our secure, state-of-the-art datacenters. We work with Microsoft consulting partners and LARs to design and host solutions for customer evaluations, long-term deployments and special projects.
