

Case Study:

Palette Software

Palette Software is assured that their information is located in a secure and compliant cloud environment that safeguards their electronic Protected Healthcare Information (ePHI) transactions with security compliant cloud services from Project Hosts.

Challenge:

As a global provider of Purchase-to-Pay automation, Palette Software needed several secure environments for the processing of invoices through their cloud application, which contains ePHI from the medical and laboratory industry.

Solution:

Project Hosts Healthcare Compliant Azure Security Envelopes and private cloud environment provides top notch security and compliance to ensure that Palette's needs are met. Along with the secure cloud, Project Hosts provides Palette with Azure File Storage, Standard DB Back up and DR.

Results:

Project Hosts created an environment on Microsoft Azure that has been audited and certified to be compliant with both HIPAA and HITRUST security standards. This environment was the right solution for Palette's commercial customers. Additionally, for the banking and FinCom industry, Project Hosts provides an ultra-secure private cloud environment to meet the most strict standards.

After the deployments were provisioned, Project Hosts began monitoring the performance along with maintaining security management for Palette from our cyber defense team, providing 24/7 Person-2- Person support.

"Palette Software required a private cloud solution for our financial institution customers who mandate a high level of security and system availability. Because Project Hosts' capabilities are flexible and robust, we were able to accommodate them outside the Azure platform and safeguard customer information. Palette integrates with over 75 of the leading ERP and healthcare-specific accounting systems globally."

About Palette Software:

Palette Software is a market leading provider of purchase to pay and AP automation software. It has more than 3,500 customers and 250,000 users worldwide, with recommend ratings of 95%+. Palette is a global solution for multiple ERPs, countries, currencies and tax rules, with unlimited users and no user license costs, bulletproof compliance control and minimal IT involvement. Palette serves multiple industries including healthcare, automotive, manufacturing, pharmaceuticals, education, energy and more.

About Project Hosts:

Project Hosts is a cloud solutions provider (CSP) and a managed services partner (MSP) that specializes in securing applications on Microsoft Azure and ensuring compliance with regulatory standards, including HIPAA, HITRUST, ISO 27001, FedRAMP, DoD IL 5. Project Hosts' comprehensive set of Azure managed services extend compliance beyond the infrastructure (IaaS) and platform (PaaS) level to protect entire applications at the Software (SaaS) level, implementing controls related to access, authentication, encryption, auditing, scanning, business continuity, change management, incident response, privacy, annual assessment, penetration testing, and required documentation.

Healthcare organizations, federal, state, and local government agencies, and enterprises rely on Project Hosts to ensure they have a cloud solution that meets their business needs, their budget, and most importantly, protects their business, employee, customer, and patient data from unauthorized access or theft. Their Healthcare Compliant Azure Security Envelope speeds and simplifies the job of moving on-premises healthcare workloads into the cloud. The ready-to-deploy Security Container supports Windows and Linux apps with full software compliance.
