

## HIPAA / HITRUST Compliant Azure Security Envelopes

A Project Hosts' HIPAA / HITRUST Azure Security Envelope provides a turnkey cloud environment that ensures your Windows and Linux applications are in full compliance with required healthcare IT security standards.

### • TURNKEY HIPAA / HITRUST COMPLIANT ENVELOPES

Whether you are migrating on-premises workloads or developing new apps like patient portals, when you deploy an application in our Azure Security Envelope we ensure your cloud solution is HIPAA / HITRUST compliant at the software level. Our cloud security experts ensure that all HIPAA / HITRUST security controls are implemented and documented for your deployment.

### • AZURE HOSTING AND MANAGED SERVICES

We have extensive experience in hosting and managing Windows and Linux applications in Azure. We provide the necessary services to deploy, secure, and manage your applications with 24x7 monitoring, support, and ongoing maintenance. In many cases, we offer hybrid-cloud integration services to on-premises environments, Office 365 and other cloud environments.

### • ISV APPLICATION COMPLIANCE PROGRAM

For Independent Software Vendors (ISVs) that need their applications available as a SaaS solution, and compliant with healthcare IT security standards such as HIPAA / HITRUST / ISO 27001, leverage our Azure Security Envelope and security experts to eliminate the expense and effort of going through your own certification process.

### • DRaaS AND OFFICE 365 EMAIL BACKUP SERVICES

We have extensive expertise integrating Azure clouds with other cloud solutions, and leveraging Azure Site Recovery and other advanced services from third party ISVs to deliver high-performance backup and recovery services, including Office 365 email backup. Our security and managed services experts for Azure can develop the right solution for your specific business needs.

### Our Capabilities

- We have a Complete Migration Plan to move your on-premises Healthcare Windows and Linux applications into Azure.
- We implement and document all HIPAA / HITRUST security controls to ensure compliance at all levels: SaaS/PaaS/IaaS.
- Our Azure Hosting and Managed Services deliver ongoing operational excellence.
- Our ISV Compliance Program can bring your apps into Azure with full compliance.
- We provide "Person-2-Person" Admin Support with 24x7 availability and US staff.

### Healthcare Client Value

- Move on-premises Windows and Linux apps into a HIPAA / HITRUST compliant Azure cloud quickly and cost-effectively.
- Leverage our expertise in Healthcare security standards and security control management methodologies to get, and maintain your compliance and certification.
- Reduce your compliance and hosting-related IT staff workloads and expenses while realizing more powerful and integrated cloud offerings.
- Spend more time developing new applications that improve your bottom line as opposed to operations and compliancy.
- Ensure the overall success and customer adoption of your cloud with ongoing monitoring, support and optimization.
