

Free Online Healthcare IT Cloud Gap Assessment

How Secure is your Cloud?

When migrating to the cloud many organizations assume that the security and compliance are properly in place when hosted on a compliant platform. But there are actions required on the part of the organization or Cloud Service Provider (CSP) to ensure security and compliance at the application level. Standards, such as HIPAA, HITRUST, and FedRAMP require various security controls and practices. Our Healthcare IT Cloud Gap Assessment helps recognize possible gaps in your cloud environment, based on these controls.

You can access our online Gap Assessment online at: www.projecthosts.com/healthcarecloud/healthcare-gap-analysis Once you register for the assessment, you can take your time and go through the questionnaire when convenient. To give you an idea of the (Yes/No) questions you will be asked, we have provided several sample questions below.

Following the Assessment

Upon completing the 100 question assessment, you will have access to your score right away. Ideally, you will cover every Control Family with a complete understanding of your compliance management processes. Odds are that you will have to make some changes to the current process. If you find that you need assistance, we are here to help. Call us at: 877-659-6055 or Email: samantha.paskorz@projecthosts.com

Sample Questions:

- **PW: Passwords**
Minimum Complexity: Are passwords case sensitive and require the use of three of the four types of characters: upper-case letters, lower-case letters, numbers, and special characters?
- **AT: Awareness and Training**
Security Awareness Training: Are All employees and contractors provided security awareness training within 60 days of hire and annually?
- **DP: Data Protection**
Storage of Covered Information: Is covered information stored on encrypted disks?
- **RA: Risk Assessment**
Do you perform risk assessments in a consistent way when there are major changes to the organization's environment, and review the risk assessment results annually?

Complete the online assessment and we will offer you a free 30 minute consultation with one of our cloud security experts.
